Notes from the Gang @ Merchify™

• T-Shirts are awesome. Full stop.

• Even though we can print up to 14" x 16" artwork, we strongly recommend you don't fill this entire template with artwork.

• Simply put, most of the best t-shirts out there don't have giant printed rectangles across them. It's rare that someone produces artwork that happens to look amazing at that size.

• Most people upload artwork that is simply too big. When in doubt, err on the side of SMALLER artwork!

• Any of your artwork should be 100% opaque. If you upload 50% transparent art, your T-Shirt prints will come up duller and darker than you expect.

• Keep this file RGB and save as a Transparent PNG for best results.

• Order samples from your own store to produce press checks. Make sure you have tweaked the artwork to your satisfaction.

• Have fun!

MERCHIFY SHIRT TEMPLATE
